2.4.1.7 Add New Routes

Add the new routes for all the newly created functions in the **web.php** file to ensure proper routing for actions such as account login and callback.

```
Route::get('/', function () {
    return view('welcome');
});

Route::view('/dashboard', 'dashboard')->middleware('auth');

Route::get('/login', [KeycloakController::class, 'redirectToKeycloak'])->name('login');
Route::get('/callback', [KeycloakController::class, 'handleKeycloakCallback'])->name('callback');
Route::get('/logout', [KeycloakController::class, 'logout'])->name('logout');
```
