2.4.2.3 Configure Return Variable

Configure the return variables in the **keycloak-web.php** file by retrieving the necessary values from the environment file.

```php
return [
    'base_url' => env('KEYCLOAK_BASE_URL'),

    'realm' => env('KEYCLOAK_REALM'),

    'client_id' => env('KEYCLOAK_CLIENT_ID'),

    'client_secret' => env('KEYCLOAK_CLIENT_SECRET'),

    'redirect_uri' => env('KEYCLOAK_REDIRECT_URI'),

    'cache_openid' => false,

    'cache_openid_ttl' => 3600,

    'allowed_resources' => null,

    'user_provider_credential' => null,

    'append_decoded_token' => false,

    'allowed_resources' => null,

    'guzzle_options' => [],
];
```
